LEARNING OUTCOMES:

Upon the successful completion of this course, students will be able to

- select appropriate equipment for water ice climbing and understand how to use this equipment. This equipment would include ice axes, crampons, ropes, harnesses, helmets and ice screws;
- understand the history and progression of crampon techniques as applied to ice climbing. Be able to demonstrate both "French technique" on lower angled ice, and modern front pointing technique on steeper ice;
- understand the history and progression of ice axe techniques as applied to water ice. Be able to demonstrate proper placement and removal of ice tools;
- understand efficient body mechanics as they apply to ice climbing – in order to climb in an efficient manner; and
- build an anchor made with ice screws, or with an Abalakov V thread.

Students should also develop

- confidence and self reliance in the ice climbing environment;
 - conservative decision making strategies;
 - leadership experience;
 - group management skills;
 - hazard evaluation skills; and
 - critical thinking skills.
