

Structured Cabling Systems – AUST 207 Autonomous Systems Technician Program

Course Outline

COURSE IMPLEMENTATION DATE: September 2020
OUTLINE EFFECTIVE DATE: September 2020
COURSE OUTLINE REVIEW DATE: March 2025

GENERAL COURSE DESCRIPTION:

This course will introduce students to copper and fiber optic structured cable systems. The course aims to offer a balanced mix of theory and practice relating to the current structured cabling system standards outlined by ANSI//TIA, ISO and other standards organizations. Students will learn proper installation and testing procedures for various copper category cabling in a complete structured cabling system. The fibre portion of the course will cover the basic concepts of light transmission theory in fiber, the different types of single-mode and multi-mode fibers, installation of various fiber optic connectors and fusion splicing of fibres. A high degree of importance will be placed on development of good hand skills and safely handling copper and fiber optic cabling.

Program Information: This course is required for successful completion of the Autonomous Systems Technician Diploma program.

Delivery: This course is delivered face to face.

COTR Credits: 3

Hours for this course: 90 hours

Typical Structure of Instructional Hours:

Instructional Activity	Duration
Lecture Hours	45
Seminars / Tutorials	
Laboratory / Studio Hours	45
Practicum / Field Experience	
Other Contact Hours	
Total	90

Practicum Hours (if applicable):

Type of Practicum	Duration
On-the-Job Experience	
Formal Work Experience	
Other	
Total	N/A

Valid from: September 2020 – March 2025

Education Council Approval Date

COURSE PREREQUISITES AND TRANSFER CREDIT:

Prerequisites: AUST 203 with a minimum grade of C- (55%) or higher.

Corequisites: N/A

Flexible Assessment (FA):

Credit can be awarded for this course through FA Yes No

Learners may request formal recognition for flexible assessment at the College of the Rockies through one or more of the following processes: External Evaluation, Worksite Assessment, Demonstration, Standardized Test, Self-assessment, Interview, Products/Portfolio, Challenge Exam. Contact an Education Advisor for more information.

Transfer Credit: For transfer information within British Columbia, Alberta and other institutions, please visit <http://www.cotr.bc.ca/Transfer>.

Student should also contact an academic advisor at the institution where they want transfer credit.

Prior Course Number: N/A

Textbooks and Required Resources:

Textbook selection varies by instructor and may change from year to year. At the Course Outline Effective Date the following textbooks were in use:

Oliviero & Woodward. *Cabling: The complete Guide to Copper and Fiber-Optic Cabling*, 5th Ed.

Autonomous Systems Technician Level 2 Lab Manual

Please see the instructor's syllabus or check COTR's online text calculator <http://go.cotr.bc.ca/tuition/tCalc.asp> for a complete list of the currently required textbooks.

LEARNING OUTCOMES:

Upon the successful completion of this course, students will be able to

- construct and test a TIA/EIA standards-based copper Structured Cabling System;
- troubleshoot and correct faults in a copper cabling run;
- employ safety & handling practices associated with copper cable & fiber optics;
- characterize the properties of a fibre optic cable;
- describe the basic functions of optical transceivers;
- describe the components of a fiber optic cable;
- discuss fiber optic cable installation using industry standards;
- build and test a fibre optic cable;
- demonstrate the use of an OTDR & Measure fiber loss with a power meter;
- perform SM fusion splicing on a fibre optic cable; and
- test and evaluate a fibre optic link.

COURSE TOPICS:

- Structured Cabling Systems
- Fibre Optic Cable
- Optical Transceivers

See instructor's syllabus for the detailed outline of weekly readings, activities and assignments.

EVALUATION AND ASSESSMENT (Face-to-Face Delivery):

Assignments	% of Total Grade
Written Copper Exam	40%
Written Fiber Exam	40%
Lab Tests	<u>20%</u>
Total	100%

Please see the instructor's syllabus for specific classroom policies related to this course, such as details of evaluation, penalties for late assignments and use of electronic aids.

EXAM POLICY:

Students must attend all required scheduled exams that make up a final grade at the appointed time and place.

Individual instructors may accommodate for illness or personal crisis. Additional accommodation will not be made unless a written request is sent to and approved by the appropriate Department Head prior to the scheduled exam.

Any student who misses a scheduled exam without approval will be given a grade of "0" for the exam.

COURSE GRADE:

Course grades are assigned as follows:

Grade	A+	A	A-	B+	B	B-	C+	C	C-	D	F
Mark (Percent)	≥ 90	89-85	84-80	79-76	75-72	71-68	67-64	63-60	59-55	54-50	< 50

A grade of "D" grants credit but may not be sufficient as a prerequisite for sequential courses.

ACADEMIC POLICIES:

See www.cotr.bc.ca/policies for general college policies related to course activities, including grade appeals, cheating and plagiarism.

COURSE CHANGES:

Information contained in course outlines is correct at the time of publication. Content of the courses is revised on an ongoing basis to ensure relevance to changing educational, employment and marketing needs. The instructor endeavours to provide notice of changes to students as soon as possible. The instructor reserves the right to add or delete material from courses.
