

Integral Calculus – MATH 104

University Studies Program

Course Outline

COURSE IMPLEMENTATION DATE: Pre 1998
OUTLINE EFFECTIVE DATE: September 2020
COURSE OUTLINE REVIEW DATE: March 2025

GENERAL COURSE DESCRIPTION:

Students work with polynomial, rational, logarithmic, exponential, trigonometric, inverse, and hyperbolic functions. They will learn integration techniques (substitution, parts, partial fractions, trigonometric substitution, numerical methods), applications of integration (volumes of revolution, work, fluid, force, surfaces, arc length, and centroids); l'Hôpital's rule and improper integrals; sequences and series; convergence tests (divergence, integral, comparison, limit comparison, ratio, root, and alternating series tests), Power, Maclaurin and Taylor series, differential equations, polar curves (common graphs, slopes, area, arc length, and conics) and parametric equations (higher order derivatives, area, and arc length).

Calculus is a necessary step in any career in the sciences including Biology, Chemistry, Commerce, Computer Science, Engineering, Geology, Mathematics, Medicine, and Physics. It is also useful in any field which uses Statistics to analyze data.

Program Information: This course is a required course for a Bachelor of Science degree in most universities. It can be used as three of the six units in Calculus which are required for an Associate of Science degree at College of the Rockies.

Delivery: This course is delivered face to face or online.

COTR Credits: 3

Hours for this course: 60 hours

Typical Structure of Instructional Hours:

| Instructional Activity | Duration |
|------------------------------------|-----------|
| Lecture Hours | 45 |
| Seminars / Tutorials | |
| Laboratory / Studio Hours | 15 |
| Practicum / Field Experience Hours | |
| Other Contact Hours | |
| Total | 60 |

Practicum Hours (if applicable):

| Type of Practicum | Duration |
|------------------------|----------|
| On-the-job Experience | N/A |
| Formal Work Experience | N/A |
| Other | N/A |
| Total | |

Valid from: September 2020 – March 2025

Education Council Approval Date

COURSE PREREQUISITES AND TRANSFER CREDIT:**Prerequisites:** MATH 103 or equivalent; or a score of 4 or 5 on the AP Calculus.**Corequisites:** None**Flexible Assessment (FA):**

Credit can be awarded for this course through FA

 Yes No

Learners may request formal recognition for flexible assessment at the College of the Rockies through one or more of the following processes: External Evaluation, Worksite Assessment, Demonstration, Standardized Test, Self-assessment, Interview, Products/Portfolio, Challenge Exam. Contact an Education Advisor for more information.

Transfer Credit: For transfer information within British Columbia, Alberta and other institutions, please visit <http://www.cotr.bc.ca/Transfer>

Students should also contact an academic advisor at the institution where they want transfer credit.

Prior Course Number: N/A

Textbooks and Required Resources:

Textbook selection varies by instructor and may change from year to year. At the Course Outline Effective Date the following textbooks were in use:

Guishard, D. *Calculus – Early Transcendentals – An Open Text*, Lyryx Learning, Creative Commons License (CC BY-NC-SA), 2018

Weir, Maurice D., Hass, Joel, and Giordano, Frank R., *Thomas' Calculus, Early Transcendentals*, 11th Edition.

Please see the instructor's syllabus or check COTR's online text calculator <http://go.cotr.bc.ca/tuition/tCalc.asp> for a complete list of the currently required textbooks.

LEARNING OUTCOMES:

Upon the successful completion of this course, students will be able to

- demonstrate an expansion of his/her previous knowledge of algebra and differential calculus;
- employ a variety of formal problem solving methods;
- formalize his/her own methods of problem solving;
- work with algebraic and transcendental functions, such as logarithmic, exponential, trigonometric, hyperbolic, and inverse trigonometric functions;
- integrate functions, using a variety of techniques (parts, substitution, trig. substitution, partial fractions, numerical, etc.);
- use integration techniques to find volumes of solids of revolution, surfaces of revolution, arc length, centroids, work, and fluid forces;
- use l'Hôpital's rule to aid in evaluating improper integrals;
- work with sequences and series, and employ a variety of tests to determine the convergence of series;
- work with, integrate, differentiate, and apply Taylor, Maclaurin, and Power series;
- solve first order differential equation, either by separating the variables or by using an integrating factor;
- draw slope fields and apply Euler's method;
- work with polar coordinates, graph polar curves, find rates of change, areas, and arc length of polar curves;
- express conic sections as polar curves;
- differentiate, find areas, and arc length of parametric equations;
- use technology (Maple) as a tool in the problem solving process; and
- reflect on the usefulness of mathematics by reading about, interpreting, and finding applications for all of the concepts studied.

This course should help students

- use written and oral communication skills effectively, employing methods appropriate to message and context;
- think clearly and critically, fusing experience, knowledge and reasoning into considered judgment;
- identify, interpret, and solve problems, effectively implementing and evaluating proposed strategies;
- use organizational, problem solving, and critical thinking skills;

- develop an ability to work both independently and in groups;
- develop an ability to transfer knowledge to new contexts;
- practice comprehending and interpreting abstract materials from text; and
- appreciate of the importance of persistence, attitude and energy.

COURSE TOPICS:

- Review of integration
- Techniques of integration: integration by parts, partial fraction decomposition, trigonometric integrals, trigonometric substitutions, numerical integration
- Applications of integration: volumes, lengths, moments and centres of mass, surface area, work, fluid pressure
- Sequences and series
- Tests for convergence: integral test, comparison tests, ratio and root tests, alternating series test; absolute and conditional convergence
- Power series: Taylor and Maclaurin series, error estimates, applications, differentiation and integration of series
- Differential equations: slope fields, separable differential equations, first order linear differential equations, Euler’s method, autonomous differential equations applications
- Polar coordinates – common graphs, derivatives, areas, arc length, and conic sections
- Parametric Equations – derivatives, areas, and arc length

See instructor’s syllabus for the detailed outline of weekly readings, activities and assignments.

EVALUATION AND ASSESSMENT (Face to Face Delivery):

| Assignments | % Of Total Grade |
|-------------------------|------------------|
| Assignments and Quizzes | 20% |
| Midterms – Best 2 of 3 | 30% |
| Maple labs | 10% |
| Final Exam | <u>40%</u> |
| Total | 100% |

EVALUATION AND ASSESSMENT (Online Delivery):

| Assignments | % Of Total Grade |
|------------------|------------------|
| Lyrx Assignments | 10% |
| Quizzes | 10% |
| Midterm Exam | 30% |
| Maple Labs | 10% |
| Final Exam | <u>40%</u> |
| Total | 100% |

Please see the instructor’s syllabus for specific classroom policies related to this course, such as details of evaluation, penalties for late assignments, and use of electronic aids.

EXAM POLICY:

Students must attend all required scheduled exams that make up a final grade at the appointed time and place.

Individual instructors may accommodate for illness or personal crisis. Additional accommodation will not be made unless a written request is sent to and approved by the appropriate Department Head prior to the scheduled exam.

Any student who misses a scheduled exam without approval will be given a grade of "0" for the exam.

COURSE GRADE:

Course grades are assigned as follows:

| Grade | A+ | A | A- | B+ | B | B- | C+ | C | C- | D | F |
|-------------------|------|-------|-------|-------|-------|-------|-------|-------|-------|-------|------|
| Mark (Percent) | ≥ 90 | 89-85 | 84-80 | 79-76 | 75-72 | 71-68 | 67-64 | 63-60 | 59-55 | 54-50 | < 50 |

A grade of "D" grants credit, but may not be sufficient as a prerequisite for sequential courses.

ACADEMIC POLICIES:

See www.cotr.bc.ca/policies for general college policies related to course activities, including grade appeals, cheating and plagiarism.

COURSE CHANGES:

Information contained in course outlines is correct at the time of publication. Content of the courses is revised on an ongoing basis to ensure relevance to changing educational, employment, and marketing needs. The instructor will endeavour to provide notice of changes to students as soon as possible. The instructor reserves the right to add or delete material from courses.
